

Why Choose Nagarin Sterile Surgical Packs?

In Nagarin sterile surgical packs, 40 g/m² spunbond material is used.
Instead of two suction hose covers, a third suction hose cover is included, specifically designed for piezosurgery, which are sometimes used by surgeons.
Additionally, instead of one foil, two thick foils are provided to allow the surgeon & assistant better control of the surgical unit light adjustment.

Semi Sterile Surgical Pack

1 Surgeon Gown (160×120cm)
2 Thick Foils (15×15cm)
2 Sleeves (1pair) (40×20cm)

WHY CHOOSE NEGARIN?

NON-TOXIC
MEDICAL GRADE

NEGARINDENT

Why Choose Negarin saliva ejector?

Unlike many brands, Negarin saliva ejectors feature a soft tip, designed to protect oral tissues & reduce patient discomfort.
The internal metal wire is made of galvanized material, while many other brands use brass.
Smooth bending capability without returning to the original shape, allowing the bent angle to remain fixed throughout the procedure.
The plastic structure is produced using medical-grade raw materials, preventing stiffness or unpleasant odors over time.
Bright, cheerful colors make tcolor-coding easy & improve organization during procedures.
The scientifically designed saliva ejector openings prevent soft tissue from being pulled into the tip, ensuring safe & continuous suction during use.

Why Choose Nagarin Absorbent Dental Bibs?

Nagarin dental bibs are high-quality absorbent non-woven bibs designed for professional dental use. They feature a tie-back design for secure & comfortable positioning during dental procedures.
These bibs are made from 40 g/m² absorbent non-woven spunbond & reinforced with a 15 g/m² laminated barrier layer, helping to absorb liquids effectively while preventing penetration to patients' clothing.
With a total weight of 55 g/m², Nagarin dental bibs offer an ideal balance of absorbency, durability, and comfort.
Available in 8 attractive colors, they are a practical & stylish choice for modern dental clinics.
Available Sizes:
Adult: 70 × 50 cm | Youth: 40 × 50 cm | Child: 40 × 30 cm

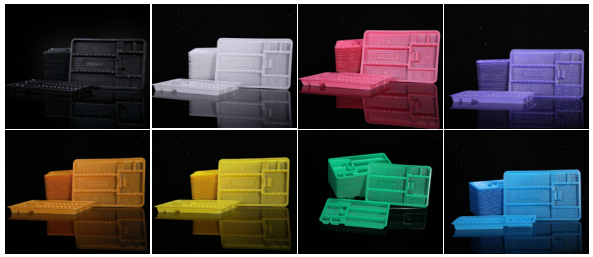

Why choose Negin masks?

Our masks are produced with high quality standards & comply with European CE certification. They feature high-elastic ear loops that allow comfortable use for long hours without causing pressure or discomfort. Made from premium imported non-woven fabric, these -3ply masks offer reliable filtration and durability. Thanks to their consistent quality and performance, they are widely exported to many countries.

Why Choose Nagarin Cups?

Most disposable cups commonly available in the dental market are made with low material weight, typically around 1.8 to 2 grams. In contrast, Nagarin colored cups are produced with a higher weight of over 3 grams, providing better strength, stability, & a more pleasant user experience during daily dental procedures.

Why Choose Nagarin Trays?

With a weight of 20 grams and a 1 mm thickness, Nagarin trays are among the heaviest disposable trays in their category worldwide. This carefully selected weight & thickness provide excellent stability during procedures, helping prevent tipping & reducing the risk of instruments sliding or falling from the tray. In addition, the wide range of colors allows easy color coding & better organization in dental and clinical environments.

Why choose our protective sleeve covers?

Our sleeve covers are 10 cm longer than most other brands & have been extended to a total length of 50cm, providing better coverage and protection. They feature a soft elastic fit for comfort & secure positioning, are made from 38 gsm non-woven spunbond, & are available in 8 different colors.

Why choose the three-piece dental unit cover?

Our dental unit cover is designed with practical features & is available i n 8 attractive colors, helping reduce installation issues on the dental unit. It is made of 38 gsm non-woven spunbond, has a clean & professional look, & is produced by a reputable & well-known manufacturer.
Section 1: Back cover with elastic edging
Section 2: Dental unit base cover with elastic edging, size 58×70
Section 3: Stretchable headrest cover, size 100×40

Why choose the one-piece dental unit cover?

This one-piece dental unit cover is made of 38 gsm non-woven spunbond, is available in 8 colors, & is produced by a reputable & well-known manufacturer. Compared to other brands, it is longer and wider, ensuring the middle part of the dental unit is not under tension, preventing tearing or displacement during use. Cover size: 225×80
